Hunt Oil Headquarters

Hunt Corporate Headquarters - Dallas, TX

The 270,000 square-foot, 14 story building is a unique space utilizing Haworth Architectural Interiors, Patterns custom bridges and file wraps, power web plug and play electrical system, custom designed private office furniture, and Compose workstations.

Both the client and architect's project philosophy was to create a statement that was totally HUNT OIL.

Hunt Oil Headquarters *continued*

Hunt Oil Headquarters

Spencer Company and Haworth were awarded the project in 2006 after mock-up evaluations. From the time that the project was awarded, Spencer worked closely with the architectural firm and the client in perfecting the typical stations to work best. When the final furniture design was decided upon, a total of 5 additional mock-ups had been made by Haworth, as well as over 165 design hours from Spencer Company's architect on staff - Sandy Christensen and the Hunt Oil Team.

Hunt Oil Headquarters

The evolution of this project was interesting in that what was originally presented and mocked up was not what was finally chosen.

Today, Hunt Oil can proudly claim their own branding through their interiors and furniture.

By utilizing the newest offering from Haworth all goals were met. The Enclose modular wall system will allow the client the flexibility for future moves, adds, and changes. From the time the order was placed for the Enclose product several floors have already been reconfigured prior to installation. The Patterns bridges distribute the Power Web plug and play electrical and data feeds to the Enclose private offices and Compose workstations allowing for ease of reconfiguration. The private office furniture is a custom solution designed especially for Hunt Oil a collaborative process between the architecture firm, Hunt Oil, Spencer, and Haworth.
